SUMMARY

Detail-oriented frontend developer with hands-on experience building interactive 3-D robot control dashboards and user-friendly boat rental interfaces. Skilled in JavaScript and React, creating real-time data flows, CRUD systems, and accessible UI designs for small teams.

HARD SKILLS

Git

Github

JavaScript

React

HTML5

CSS3

SOFT SKILLS

Responsibility, Curiosity, Problem-solving

LANGUAGES

Spanish (Native) · English (B2)

RELEVANT PROJECTS

Robotic Control and Simulation Platform

- Integrated an interactive 3D robot visualization using Three.js and React Three Fiber.
- Developed real-time bidirectional communication between frontend, backend, and hardware using WebSockets.
- Developed a CRUD system for storing and managing robot joint positions.
- Implemented UI customization features including dark mode and configurable accent colors.

Boat Rental Management System

- Designed and implemented a user interface optimized for daily operational use.
- Built CRUD functionality for managing rental records and business data.
- Implemented local data persistence to allow operation without a dedicated server.
- Designed the application to be usable by non-technical users in a day-to-day work environment.

EDUCATION

B.Sc. Robotics Engineering

Universidad de Guadalajara · In Progress
